Rolled \& Molded Rod Specifications

| Value | Test Method | Grade "L" | Grade FR4 |
| :---: | :---: | :---: | :---: |
| SPECIFIC GRAVITY | ASTM D349 | 1.3 | 1.8 |
| HARDNESS, M SCALE | Rockwell M | 105 | 110 |
| TENSILE STRENGTH (psi) | ASTM D349 | 11,000 psi | 25,000 psi |
| COMPRESSIVE STRENGTH (psi) | ASTM D349 | 19,000 psi | 35,000 psi |
| FLEXURAL STRENGTH (psi) | ASTM D349 | 16,000 psi | 35,000 psi |
| heat resistance | ${ }^{\circ} \mathrm{F}$ Short time | $275^{\circ}$ | $300^{\circ}$ |
|  | ${ }^{\circ} \mathrm{F}$ Continuous | $225^{\circ}$ | $250^{\circ}$ |
| SPECIFIC HEAT | Calories/gram/ ${ }^{\circ} \mathrm{C}$ | . $035-.040$ | 0.26 |
| THERMAL CONDUCTIVITY | $10^{-4} \mathrm{cal} / \mathrm{sec} / \mathrm{cm}^{2} /\left({ }^{\circ} \mathrm{C} / \mathrm{cm}\right)$ | 7 | 1.2 |
| COEFFICIENT OF THERMAL EXPANSION | $10^{-6} \mathrm{~cm} / \mathrm{cm} /{ }^{\circ} \mathrm{C}$ | 20 | 10 |
| WATER ABSORBTION | Under . 250 " diameter | 2.50\% | 0.75\% |
| \%-24 hrs | .250" to .499" diameter | 2.00\% | 0.50\% |
|  | .500" to 999" diameter | 1.50\% | 0.50\% |
|  | 1.00" diameter and over | 1.20\% | 0.50\% |
| DISSIPATION FACTOR | $10^{6}$ Cycles, Condition A |  | 0.032 |
| DIELECTRIC CONSTANT | $10^{6}$ Cycles, Condition A |  | 4.80 |
| ELECTRIC STRENGTH | Volt/Mil, Short time |  | 500 |
| FLAMMABILITY RATING | U.L. | 94 HB | $94 \mathrm{~V}-\mathrm{O}$ |
| MILITARY SPECIFICATION |  | MIL-I-24768/15 | MIL-I-24768/27 |

Atlas Fibre Company Rolled and Molded rods are also compliant with current and/or cancelled specifications NEMA LI1-1998, MIL-P-79, LP509, and ASTM D709

Atlas Fibre Company Rolled and Molded rods are composed by rolling layers of resin impregnated material between pressure rollers and curing the rods in cylindrical molds under high heat and pressure. During this process the structures of these thermoset materials cross link, creating solid homogeneous rods that will not soften appreciably under the reapplication of heat. Our rods are then precision ground to the closest tolerances in the industry.

All values given are average based on test samples. The performance characteristics attributed to the products described herein are based on assumptions of general and reasonable use. As results cannot be predicted or guaranteed for any specific set of conditions, each user should make their own determination of these products' suitability for their particular application. 05/19
