

**FALCONBOARD®**  
Stronger. Flatter. Greener. Better.™

# The green graphic board

Made primarily from forest resources ...recyclable and renewable.

## Ideal for **signage, exhibit** and **display** applications

Falconboard® from Hexacomb® is a fully recyclable, rigid graphics media board which offers **superior performance** over most traditional foam options. Its paper-based construction makes Falconboard® an ideal solution for your display board needs — regardless of where your business is located.

The products' structural characteristics — **strong, flat, dimensionally stable and rigid** — provide improved performance and **excellent printability** compared to other materials. Falconboard® is also recommended for temporary or semi-permanent POP applications as a replacement for traditional wood or foam materials.

Falconboard® products are environmentally responsible because they are **completely recyclable** and made primarily from **renewable forest resources**.\*

### FALCONBOARD® PRINT

Design provides the structural support expected for signage and display: no bowing, no bending.

- Suitable for the most demanding requirements due to its high rigidity and dimensional stability
- Direct print eliminates the added cost and labor step of mounting
- Consistent, more visually appealing white point to equal the printing capabilities of foam boards

### FALCONBOARD LUMINOUS™

Designed with bright white facing and traditional cores to provide the brightest white print surface.

- The high white point value delivers a stunning final product
- Lets your customer's most vibrant artwork print true to color

### FALCONBOARD® ALL WHITE

Produced with white core and liners to provide a clean white edge for improved visual appeal.

- Significantly more rigid than foam
- Excellent brightness and printability

### FALCONBOARD® BLACK SERIES

Falconboard® Black Series provides a truly dark surface for applications such as outdoor movie promotions, theatre displays and more.

- Superior opacity that brings out the colors of the printed images
- Dark edge improves aesthetics
- Ideal environmentally responsible replacement for foam boards

### FALCONBOARD® MOUNT

This kraft paper backing board is engineered to be used with demanding roll media and mounting requirements as well as the production of large 3D structures.

- Improved visual impact — cell structure not visible through lamination
- Used as mounting board, it strengthens POP displays made of corrugated

### FALCONBOARD® BUILD

Falconboard® Build is engineered for demanding 3D POP applications that market heavier products. It allows designers more creativity compared to foam board, wood and corrugated.

- Tough core allows clean V-cuts
- Significantly lighter than wood and metal and easier to handle

### MERLINBOARD™

Merlinboard™ doublewall E/B fluted corrugated board is an all-white, sustainable material.

- Offer additional strength vs. other fluted corrugated boards
- Features excellent printability, outstanding flatness and reduced visibility of the fluted core
- Extremely lightweight and affordable with superior strength
- Ideal for customers looking to update in-store graphics on a frequent basis
