

IntePro[®] UltraSmooth[™]

There Is No Substitute!

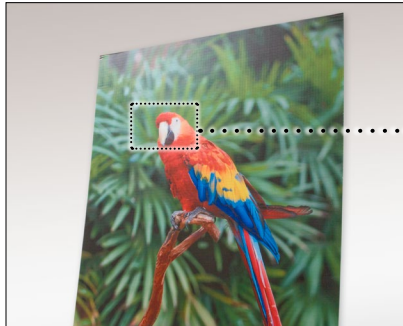

You may be asking yourself lately, where can I find this smooth corrugated plastic I've been hearing so much about? With Digital Flatbed Printers having such a big impact on the graphics industry these days, this product seems too good to be true. Don't let the competition fool you. Inteplast introduced this material into the market over five years ago and still offers the **HIGHEST QUALITY PRODUCT!**

Superior Printing Quality!

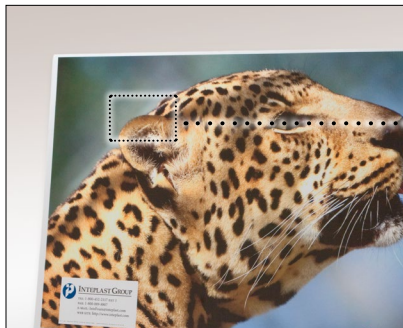

- Offers superb quality on all digital flatbed printers
- Available in 48"×96", 24"×18", 18"×24", and run to size jobs
- IntePro[®] UltraSmooth[™] offers a higher print quality, output, and a lower ink consumption.

Close Look...

Regular corrugated grooves after printing are more distinct

IntePro[®] UltraSmooth[™] grooves are less visible and extremely smooth

True Innovator:

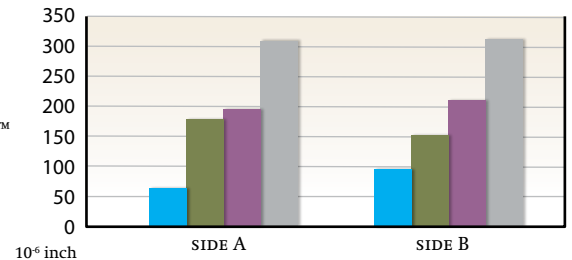

Patent No.: US 6,759,114 B2 is the unique identification for the superior smoothness of IntePro[®] UltraSmooth[™].

IntePro® UltraSmooth™

Smoothness Comparison: UltraSmooth™ vs regular corrugated

Test 1: Surface Roughness Test

UNIT: 10 ⁻⁶ INCH	SIDE A	SIDE B	
IntePro® UltraSmooth™	66.3	95.3	IntePro® UltraSmooth™
Regular corrugated(C)	177.8	152.4	Regular corrugated C
Regular corrugated(M)	196.0	217.3	Regular corrugated M
Regular corrugated(P)	313.3	317.6	Regular corrugated P

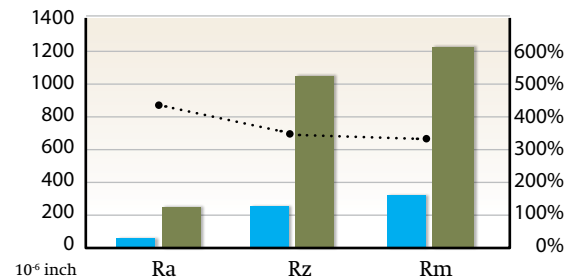

Test 2: Hommel Tester T1000C

UNIT: 10 ⁻⁶ INCH	Ra	Rz	Rm
IntePro® UltraSmooth™	69.29	306.10	373.20
Regular corrugated	298.80	1068.00	1238.00
Surface Superior Rate	431%	349%	332%

Ra- Arithmetical mean roughness
 Rz-Ten-point mean roughness
 Rm-Maximun peak
