WALLTUF®
Waterproof Wall and Ceiling Liner Panels

Overview

WallTuf wall and ceiling liner panels are ideally suited for both industrial and residential interior applications. These waterproof panels are light weight, have an attractive beaded texture, absorb scratches and clean up very easily. WallTuf panels are a great choice for areas that are moist, wet or damp. Water is the leading cause of structural damage. Once water infiltrates a structure, decay and ruin are usually not far behind. Using properly installed WallTuf waterproof panels where moisture is likely to collect guards against structural deterioration. To install as a wall panel, simply apply over drywall, no need to tape, mud, or sand. WallTuf can be cut to fit into lay-in ceiling grids—you'll eliminate unsightly water stains on your ceilings for good.

Main Benefits

- Non-absorbent—no swelling, rotting, or water discoloration
- Color goes all the way through—dings or scratches won't show
- Easy installation—can be scored with utility knife and snapped
- Will not support mold—very hygienic, does not contribute to “sick-building” syndrome
- fiberglass free—No irritating, harmful fiberglass dust
- Attractive cracked ice texture that resists marring—perfect for high traffic areas
- USDA/CFIA approved for use in federally inspected food processing plants
- Made from recycled plastic, and 100% recyclable
