

PERFORMANCE + DURABILITY

FOUR DECADES OF PROVEN PERFORMANCE IN STADIUM ROOFING WITH LEXAN™ SHEET

Today's sports stadiums and arenas demand unique design concepts while having to meet strict requirements for safety, weatherability and strict compliance codes. Architects need to provide spectators with an excellent viewing experience along with outstanding performance, environmental responsibility and aesthetics to provide safe, satisfying experiences for visitors.

SABIC's LEXAN™ sheet products are the materials of choice for sports stadiums in many nations. Compared to glass, it provides design freedom, lightweight, high stiffness and more than 250 times the impact resistance, to reduce the risk of breakage from wind and hail, as well as vandalism.

Beginning with its first application in a stadium in Split, Croatia in 1979, LEXAN sheet has been selected for several Olympic arenas, including the Barcelona, Spain, Chongqing, China and Sydney, Austria facilities, as well as stadiums that hosted the FIFA 2014, 2010, UEFA Euro 2004™ and 2008™ football championship. The LEXAN sheet has been used in more than 50 stadiums over the world, including the Arena do Grêmio and two FIFA World Cup™ 2014 stadiums in Brazil.

OVER 50 STADIUMS WITH LEXAN™ SHEET ROOFING AND COUNTING...

- > Split, Croatia 1979
- > Bilbao, Spain 1981
